

Executive Summary

Problem Statement

RSVP Movies is an Indian film production company which has produced many super-hit movies. They have usually released movies for the Indian audience but for their next project, they are planning to release a movie for the global audience in 2022.

The production company wants to plan their every move analytically based on data and have approached you for help with this new project. You have been provided with the data of the movies that have been released in the past three years. You have to analyse the data set and draw meaningful insights that can help them start their new project.

You are a data analyst and an SQL expert. You have to use SQL to analyse the given data and give recommendations to RSVP Movies based on the insights. For your convenience, the entire analytics process has been divided into four segments, where each segment leads to significant insights from different combinations of tables. The questions in each segment with business objectives are written in the script given below. You have to write the solution code below every question and submit the same SQL script file with the solution in the 'Submission' segment.

This summary describes our analysis and mentions suggestions to RSVP based on the questions given in the assignment

Questions	Results
Q1	Total no. of rows 1. Director_mapping: 3867 2. Genre: 14662 3. Movie: 7997 4. Names: 25735 5. Ratings: 7997 6. Role_mapping: 15615
Q2	Movie table: columns having null values are Country (20), Worldwide_gross_income(3724), Languages (194), and Production_Company (528)
Q3	1. Total number of movies released in the year 2017, 2018 and 2019 respectively are 3052, 2944 and 2001. 2. Month-wise, number of movies released every year in every month: January 804 February 640 March 824 April 680 May 625 June 580 July 493 August 678 September 809 October 801 November 625 December 438
Q4	Number of movies produced in the USA or India in the year 2019 is 1818.
Q5	The unique genres are Adventure, Action, Sci-Fi, Crime, Mystery, Drama, Fantasy, Thriller, Comedy, Horror, Family, Romance and Others
Q6	The Drama genre has the highest movies produced (4285) in all time.

Q7	Movies that were made in only one genre are 3289 in number.

Recommendations for a successful venture:

1. **Production House:** The RSVP Movies should consider collaborating with Dream Warrior Pictures and National Theatre Live as they are ranking no. 1 based on no. of movies produces and Marvel Studios based on the number of global votes. Also, for a multilingual approach, to produce a high rating (>8) movie, they should collaborate with Star Cinema and Twentieth Century Fox
2. **Genre:** Based on past trends, we may assume that if more no. of movies were produced in the Drama genre (globally) it might be an audience favourite and producing a movie in the Drama genre may be profitable. Also, according to the voting trends in the USA, Drama has received more than 1000 votes for 24 movies. If the production houses want to look at genres apart from Drama, they should look at the other two genres as well in the global top three: Drama, Action and Comedy.
3. **Time of Release:** Similarly, since most movies were released in the month of March globally, we might assume that this decision was taken in the past as film makers must have observed that March might be the highest grossing month and people were willing to come out to see movies more often in March. Hence, RSVP Movies should look at a date in March to release their upcoming movie for more collection.
4. **Name of the Movie:** The name of the movie should start with "The" for a much better audience appeal and rating.
5. **Duration:** In any genre, the duration of the movie made should ideally be at least 102.4 and at most be 112.9 minutes based on the moving average grouped by each genre.
6. **Language preference:** To suit the global audience better, RSVP movies should consider making the movie in German language along with the other languages chosen due to a higher number of audience speaking the German language.
7. **Directors:** The directors that RSVP Movies should be working with are James Mangold, Anthony Russo and Soubin Shahir. Furthermore, if they want to look at a director who is the most experienced, they should also consider working with Andrew Jones.
8. **Actors:** Based on median ratings the actors that should be hired to work in the upcoming movie should be Manmmootty and Mohanlal. However, based on average ratings, the best choice of actor and actress who should be hired are Vijay Sethupathi and Taapsee Pannu. Along with this, the actresses who have worked and given superhit movies and Parvathy, Thiruvothu, Susan Brown and Amanda Lawrence.
